

Outsourcing the financial administration

The challenge

- Meltwater News has grown extensively through organic growth in which F&A activities have been outsourced to local accounting/ bookkeeping firms
- Quality of the provided F&A information is low
- It s time-consuming to consolidate the various F&A information

The solution: outsourcing

- Transform local outsourced F&A contract to one centralized single outsourcing partner with single way-of-working
- Standardize and use single application to optimize current processes to increase quality
- Use standard output of data to consolidate F&A information in single consolidation and reporting tool

The results

- Improved quality of Finance processes
- Improved governance and control over Finance processes
- Improved consolidation process (standardized input)

Meltwater News is a global company founded in Norway in 2001.

Meltwater News currently serves thousands of clients worldwide with services ranging from online news

monitoring, trend analysis

and custom newsfeeds to newsletters and instantaneous translation between 17 different languages.
